Monthly Management Report

June 2024 · Demo Client

Prepared for	Demo Client
Engagement	DEMO-0006
Report date	11 November 2026
Version	1.0
Prepared by	ProQuant Analytics · info@proquantanalytics.com
Run ID	ra_20261111T142110Z_c6a6dc

Executive summary

Demonstration report. Built entirely from synthetic data generated by ProQuant for illustration. The company, its customers and its figures are fictitious.

This is the June 2024 management report of Demo Client, produced by the automated reporting process built by ProQuant Analytics. The data feed was checked (11 controls), cleaned with every change logged, turned into the KPI catalogue and compared with the prior month, the same month last year and the budget. The commentary below is drafted from the numbers and reviewed by the analyst before release.

Release decision: RELEASE WITH NOTES

8 controls passed, 3 warning(s), 0 failure(s) for June 2024. Notes: Feed on time; Budget loaded for every region; Product line mapped.

NET REVENUE
1,698,883
+17.9% vs prior month · +32.3% vs last year

GROSS MARGIN %
40.9%
+0.5 pts vs prior month · -2.1 pts vs last year

ORDERS
561
+8.1% vs prior month · +25.5% vs last year

AVERAGE ORDER VALUE
3,028
+9.1% vs prior month · +5.4% vs last year

RETURN RATE
3.6%
-0.2 pts vs prior month · +2.0 pts vs last year

NEW CUSTOMERS
67
-10.7% vs prior month · +52.3% vs last year

Commentary

- **Revenue** Net revenue was USD 1.70m in June 2024, +17.9% against May, +32.3% against the same month last year.
- **Budget** The total cannot be compared with budget: the target of East is missing. For the 4 regions that have one, net revenue is -1.3% against budget (USD 1.24m against USD 1.26m).
- **Drivers** The increase of USD 258k comes mainly from Central (+USD 127k) and North (+USD 78k). Moving the other way: West (-USD 40k).
- **Budget** Below budget by more than 2%: West -7.5% (-USD 16k); South -3.3% (-USD 9,702).
- **Products** Services had the largest change among product lines: net revenue rose by USD 181k against May (+35.5%).
- **Margin** Gross margin was 40.9%, +0.5 points against May; the discount rate rose to 7.6% (+0.8 points).
- **Returns** Returns are elevated: 3.6% of gross sales against 2.3% on average over the previous 6 months; the highest is Central (4.7%).
- **Customers** 67 new customers placed their first order (-8 against May).
- **Year to date** Year to date net revenue is USD 7.97m, +15.5% against the same period last year.
- **Unusual** Unusual against the recent months: Central net revenue USD 393k (median USD 285k).
- **Data** Release decision: RELEASE WITH NOTES. Feed on time: +3 day(s) against the agreed date 05 Jul. Budget loaded for every region: no target for East. Product line mapped: 16 line(s) without product line (1.4%).

- **Analyst** Illustrative note (synthetic data): the higher returns in Central come from a few large orders returned after delivery; the regional manager is following up with the customers.

What the automation did this month

17,430 lines received over 18 months	**982** duplicate lines removed	**12** lines in the exceptions queue	**62 s** processing time (with PDF allowance)

Methodology

This report tells what happened in the month. How each KPI is built, and what each control checks, is in the methodology document.

Results

1. June 2024 at a glance

KPI	Current	Prior month	vs prior	Prior year	vs prior year	Budget	vs budget	Status
Net revenue	1,698,883	1,440,681	+17.9%	1,283,845	+32.3%	n/a	n/a	good
Gross margin	695,406	581,848	+19.5%	552,551	+25.9%	n/a	n/a	good

5. Data controls for June 2024

Area	Control	Result	Rule	Status
Feed	Feed complete (volume)	124% of the usual volume (1,177 lines against a median of 947)	warn below 85%, fail below 70%	PASS
Feed	Lines match the sender's control total	1,177 lines after removing duplicates against 1,177 sent (+0)	equal; warn within 1.0%	PASS
Feed	No duplicate lines	none	warn above 0%, fail above 5%	PASS
Feed	Feed arrived	received	a file for the month	PASS
Feed	Feed on time	+3 day(s) against the agreed date 05 Jul	arrive within 1 day(s); warn up to 4	WARN
Feed	Feed covers the whole month	last order on 30 Jun, 0 day(s) before month end	warn above 3 days, fail above 7	PASS
Data	Budget loaded for every region	no target for East	a target for every region	WARN
Data	Exceptions queue small	none	warn above 0%, fail above 1% of lines	PASS
Data	Product line mapped	16 line(s) without product line (1.4%)	warn above 0.5%, fail above 2%	WARN
Result	Net revenue in line with recent months	net revenue +1.5 robust deviations from the last 6 months	warn beyond +-2.5	PASS
Result	Period unchanged since the last run	same inputs as the previous run	same inputs as when last reported	PASS

These lines are not in any figure. The data owner receives the full queue (tables/exceptions_queue.csv) every month to correct at source.

6. Release decision for every month

The same controls were run for every month received, so the history shows when the process would have stopped a report. Over 18 months: 9 RELEASE, 8 RELEASE WITH NOTES, 1 HOLD.

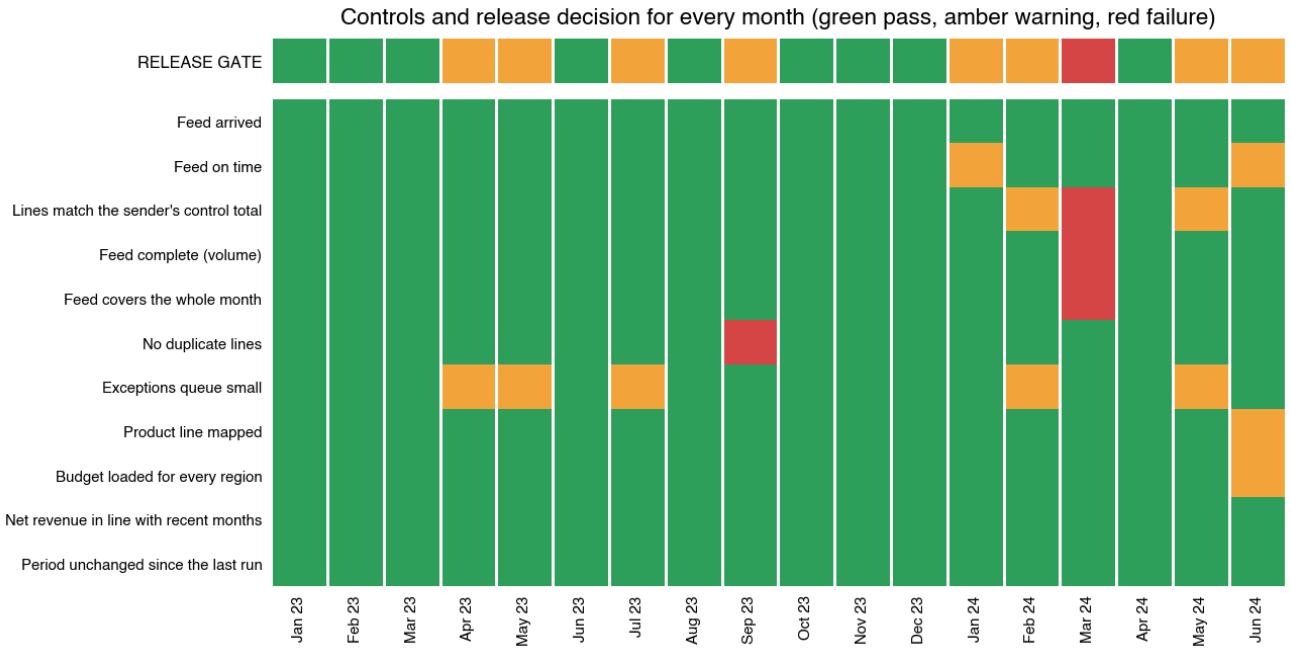

Figure 7. Controls and release decision by month. Source: tables/controls.csv, tables/gate.csv

7. Proof against the manual report

48 figures of the manual report (2024-04, 2024-05, 2024-06) were compared with the automation: **28 match**, **19 differ for a reason that was identified** and **1 are unexplained**. Verdict: **Open: unexplained differences**.

- The manual report counts order lines; the automation counts distinct orders.
- The manual report does not deduct returns.

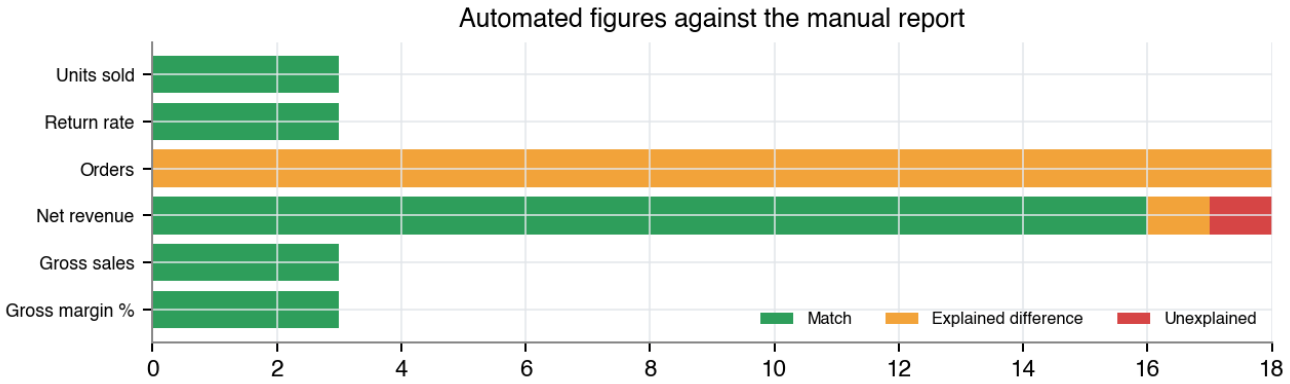

Figure 8. Parity by KPI. Source: tables/parity.csv

KPI	Figures	Where	Difference	Status	Explanation
Orders	18	6 scopes in Apr 24, May 24, Jun 24	-56.7% to -48.4%	WARN	The manual report counts order lines; the automation counts distinct orders
Net revenue	1	East May 24	-2.8%	WARN	The manual report does not deduct returns
Net revenue	1	West Apr 24	+2.7%	FAIL	No alternative definition reproduces the manual figure

Source: tables/parity.csv

8. Business case

Manual effort per monthly cycle falls from 23.0 to 1.5 hours (93% less), about 258 hours a year worth USD 10,312; payback on the project fee in about 14 months. Manual hours are the client's estimate; automated hours are the review time agreed plus the measured run time.

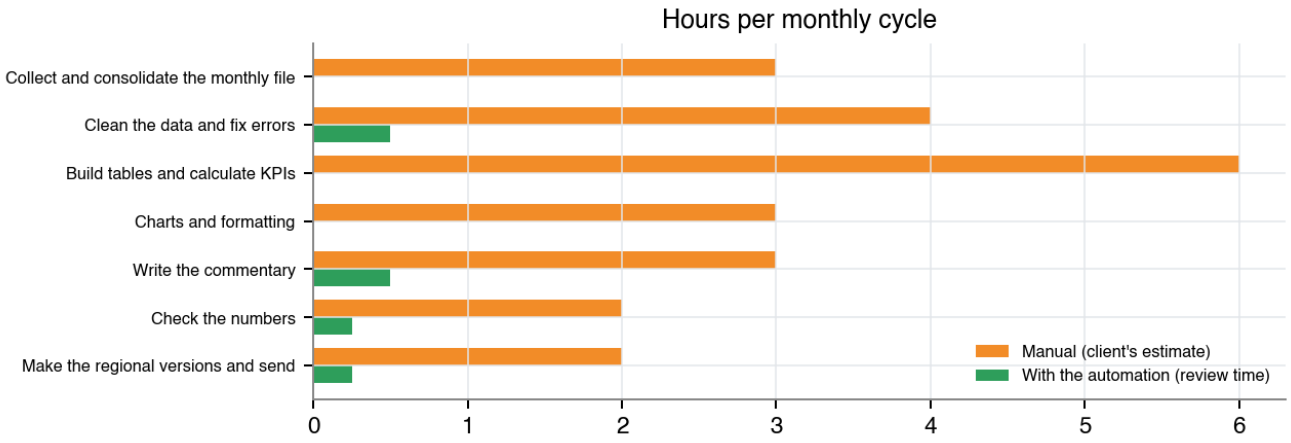

Figure 9. Hours per cycle. Source: tables/business_case.csv

Task	Manual hours	Automated hours	Hours saved
Collect and consolidate the monthly files	3.00	0.00	3.00
Clean the data and fix errors	4.00	0.50	3.50
Build tables and calculate KPIs	6.00	0.00	6.00
Charts and formatting	3.00	0.00	3.00
Write the commentary	3.00	0.50	2.50
Check the numbers	2.00	0.25	1.75
Make the regional versions and send	2.00	0.25	1.75

Source: tables/business_case.csv

Limitations and assumptions

- The figures are only as good as the files received; the controls detect missing, late, duplicated or implausible data, not a wrong figure that looks plausible.
- The commentary states what changed and where; it does not explain why. The analyst's notes and the business add the explanation.
- Budget comparisons are shown only when every region has a target. Product-line budgets are not in the targets file.
- The business case uses the client's own estimate of the manual effort; it was not measured.
- Nothing is sent by the template: email drafts are prepared and a person presses send.

Appendix

KPI catalogue

KPI	Formula	Format	Definition
Gross sales	gross_sales	money	Sum of units x list price before discounts and returns
Net revenue	gross_sales - discounts - returns	money	Gross sales less discounts less returned value
Gross margin	net_revenue - cogs	money	Net revenue less cost of goods sold
Gross margin %	gross_margin / net_revenue	pct	Gross margin divided by net revenue
Orders	orders	int	Distinct order numbers with at least one valid line (not order lines)
Units sold	units	int	Sum of units on valid lines
Average order value	net_revenue / orders	money	Net revenue divided by orders
Discount rate	discounts / gross_sales	pct	Discounts divided by gross sales
Return rate	returns / gross_sales	pct	Returned value divided by gross sales
Active customers	customers	int	Distinct customers with a valid line in the period
New customers	new_customers	int	Customers whose first valid line in the data falls in the period
