13	BI exports for Power BI / Looker Studio	`BI_Exports/ (CSV, long format)`

3. Who does what

When	What	Who
This week	Install the scheduler pack in the client's environment and run it once by hand	Operator
Next close	Run the automation next to the manual report	Report owner
Next close	Review the exceptions queue and approve the email drafts	Analyst
After a clean parity month	Retire the manual report	Sponsor
Each quarter	Review the thresholds of the controls	Report owner

4. How the files work together

- The **runbook** says what to do when a control holds the release; the operator should read it before the first live run.
- **Regional bulletins** and the **distribution pack** are drafts: nothing is sent until a person approves it.
- The **presentation** has speaker notes on every slide, and its charts can be edited in PowerPoint.
- The **workbook** recalculates: choose a region in the yellow cell of the Control panel.
- Editing the Excel and PowerPoint files needs Office, or a free tool such as Google Sheets and Slides. Reading them does not: both are inside `00_START_HERE`.

5. What we need for the next run

The monthly sales file and its control total, the targets, the recipient list, and any change to a KPI definition.

6. Data and access

All client data will be deleted within 10 business days of the end of the engagement (or retained for the next run as agreed).
